

I am opposed to allowing SBC to enter the long distance field. Because they are feeling the crunch from competitors like TDS Metrocom that gives customers better pricing and much better customer service, they have been going WAY Below tariff rates on these ridiculous "Winback" efforts. They have lowered their standards for "ICB" (Individual Case Basis) pricing way down to include defectors that have as few as 15 lines. I am talking about line rates below \$10 per line and local call rates as low as \$.047 cents per call. HELLO, WHAT ARE TARIFF RATES FOR???? Let's stop kissing the fanny of SBC and not allowing them to become a monopoly again.
